[ING250000 Draft General Permit NCCW 07102013E.pdf](#)

Steve:

I am transmitting to you this afternoon our revised draft general permit and fact sheet for Sand & Gravel Operations, ING490000. As I believe you are aware, we have been working on making some major structural changes to the general permit template, so we are sending these revised documents back to you at U.S. EPA Region 5 so that your staff can review them as per our MOA. Also we have made revisions to the antidegradation evaluation discussion in the fact sheet based on implementation procedures we have developed.

Janet and Pat, I have included you on this email because I have heard that Steve is on a temporary re-assignment, and I'm not certain who would be the appropriate recipient. I would appreciate it if you could make sure that these documents are forwarded to the appropriate person.

I would appreciate knowing which "lucky" staff person gets to review these documents. As always, please feel free to contact me if there are any questions along the way.

FYI, we are still working on the NOI draft documents for all of our GPs and hope to be able to share those with you in the not-too-distant future.

Catherine Hess, Chief

Permits Administration Section
